Re: Appeal of the decision of the DCRA, as issued by Zoning Administrator Matthew LeGrant, dated December 24, 2009, denying the request for enforcement of BZA Order #17055 and/or Request for modification of BZA Order #17055

Dear Chairman Loud:

At a public meeting, advertised and rescheduled because of a snow emergency, held on Wednesday evening, February 17, 2010, Advisory Neighborhood Commission 3/4G (the ANC) voted 5-1 (the dissenting vote by proxy; a quorum consisting of four members present) to appeal the decision of the DCRA, as issued by Zoning Administrator Matthew LeGrant, dated December 24, 2009, denying the request for enforcement of BZA Order #17055 and/or to request modification of BZA Order #17055. The ANC may appeal the decision as a matter of right. Therefore, please take notice of our ANC's appeal.

We understand that Knollwood Neighbors, Inc., a non-profit, is also party to this appeal. While we join in the appeal regarding this noise issue, we also want to convey our appreciation for Knollwood and the Army Distaff Foundation for how they operate Knollwood generally, for being good neighbors, and for their admirable mission in caring for elderly individuals with unique needs.

The ANC is concerned that Knollwood (through the Army Distaff Foundation) is not operating the chiller on the roof of its new addition in a way that sufficiently minimizes the noise impact on the surrounding R-1-A neighborhood. When the ANC supported Knollwood's original Application for a Special Exception in 2004, it was represented to the ANC that the new addition would cause little to no increase in the noise experienced by the neighbors (relative to prior noise

Board of Zoning Adjustment
District of Columbia
CASE NO.18057
EXHIBIT NO.1B

conditions), and based on that representation and with that condition (among others), the ANC approved the application. At the time of the application there was (and still is) in effect a 25-year moratorium on further construction at Knollwood, but the ANC and the Knollwood Neighbors agreed to set aside that moratorium in this instance to allow the addition to proceed, again, premised on the representations and conditions respecting noise and otherwise. The same representations and conditions regarding noise (and otherwise) were referenced by the BZA when it approved that Application in BZA Order #17055.

Upon completion of construction in 2008, Knollwood began operating a chiller, which Knollwood erected outside the mechanical penthouse on the roof of the addition. The chiller is reported by the neighbors to make a loud and unacceptable noise that persists day and night, all year long. Although Knollwood made some efforts to abate the noise, the noise remains an issue for the neighbors. The ANC understands that certain acoustical measurements have been taken, and the matter reviewed strictly from the point of view of the technical decibel level requirements of the DC noise ordinance; however, the ANC does not believe such inquiry is sufficient to address the representations and conditions made respecting the application and the BZA Order. The letter and spirit of the BZA Order, and related documents regarding the addition, is that the chiller would not be a noise issue from the point of view of the neighbors.

Thus, the ANC remains concerned that the DCRA has failed to enforce the BZA's order and requirements, as well as the laws and regulations of the District of Columbia, as follows:

1. Knollwood has not met the conditions and requirements in the BZA Order, including but not limited to Conditions 1, 4 and 5.
 - Condition 1 requires that Knollwood build the addition, including the mechanical penthouse, "in accordance with the plans and materials submitted into the record as Exhibits Nos. 130 and 155." Exhibit 155 implies that the chiller would be included within the mechanical penthouse and shows the mechanical penthouse placed back from the abutting neighboring houses. Knollwood moved the location of the mechanical penthouse much closer to the neighboring homes. Knollwood also built a separate chiller not enclosed within the mechanical penthouse.
 - Condition 4 requires that a neighborhood committee meet on a regular basis to discuss amicably these and other issues. The committee has not been convened, at least any time in recent years. Indeed, such a group may resolve other issues of concern.
 - Condition 5 requires noise abatement measures that are sufficient to satisfy the standard set forth in the BZA Order -- and represented by Knollwood in its Application -- that the new addition will cause "no, or minimal, increase in noise."
2. Knollwood may not have complied with the zoning laws of the District of Columbia, including 11 DCMR 411.3, which requires that all rooftop mechanical equipment must be housed in a single enclosure.

The ANC requests that the BZA give “great weight,” as required by law, to the views of the ANC.

The ANC requests that Knollwood Neighbors be permitted to submit materials in this Appeal and/or Request for Modification pursuant to the BZA rule that permits the Applicant ANC to “solicit pertinent information.”

Chairman Gary Thompson, or any other Commissioner, is authorized to present the report of the ANC and to represent and act for the ANC with respect to any and all matters related to this appeal and/or request for modification.

Sincerely,

A handwritten signature in cursive script that reads "Gary Thompson".

Gary Thompson
Chairman ANC 3/4G
