

Statement of Applicant

To the members of the BZA and to whom this statement may concern.

The reason for this statement is to give an explanation for the existing parking structure. The existing parking structure was built with the intention for a car parking garage, it was also built and intended use for my kids to play due to not having enough space in the front porch to play and well due to living on Irving Street a main, busy, and very trafficked street at times, I find it very unsafe for my kids to play. So this existing and intended structure was really and mainly built for my kids to have the space to play and also intended for a car parking. I built the structure without knowing that a building permit was needed. to build the structure, just thinking that well since it was part of my property I did not need a building permit. I hope that in some way my statement has been somewhat specific and somewhat explaining of the use and intention of the structure.

Thank you.
