C/S Parking Garage Screens

C/S Parking Garage Screens provide an aesthetic architectural solution to the engineering problem of garage ventilation and noise control. Capable of opening large openings for multiple parking levels, C/S Parking Screens offer noise protection to adjacent buildings and the street below from automobile headlights. C/S Vision Barriers are offered in a wide array of patterns, varying in width depth and face area for maximum air exchange from single vertical lanes. In stationery designs, C/S Parking Screens can open massive floor levels without intermediate supports.

- Available in aluminum or steel
- Available in a wide array of patterns
- Available in a wide array of colors
- Available in a wide array of depths
- Available in a wide array of face areas
- Available in a wide array of heights
- Available in a wide array of widths
- Available in a wide array of lengths
- Available in a wide array of thicknesses
- Available in a wide array of weights
- Available in a wide array of volumes
- Available in a wide array of masses
- Available in a wide array of densities
- Available in a wide array of temperatures
- Available in a wide array of pressures
- Available in a wide array of forces
- Available in a wide array of moments
- Available in a wide array of torques
- Available in a wide array of powers
- Available in a wide array of energies
- Available in a wide array of enthalpies
- Available in a wide array of entropies
- Available in a wide array of Gibbs free energies
- Available in a wide array of Helmholtz free energies
- Available in a wide array of Gibbs free enthalpies
- Available in a wide array of Helmholtz free enthalpies
- Available in a wide array of Gibbs free entropies
- Available in a wide array of Helmholtz free entropies
- Available in a wide array of Gibbs free enthalpies
- Available in a wide array of Helmholtz free enthalpies
- Available in a wide array of Gibbs free entropies
- Available in a wide array of Helmholtz free entropies

CONSTRUCTION SPECIALTIES GROUP
METAL LOUVER / GRILLE SYSTEMS

PAINTED ALUMINUM

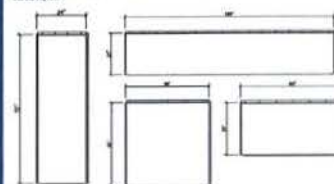

Technical Information

System Depth	1 1/2" nominal
Material	Aluminum
Material Thickness	.080" nominal (some gauges available)
Panel Joints	1/2" nominal standard (1/4" - 1" available)
Finish	Fluoropolymer, colorfast color powder
Finish Warranty	30 year standard
Weight	Less than 7 pounds per square foot

Panel Size Parameters

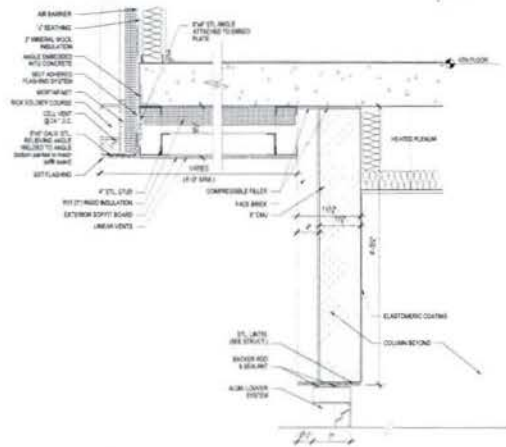

These are the recommended maximum size panel panels. If the panel you would like the inside these panels. Dr. Design can easily accommodate it. For larger sizes, please contact a Dr. Design representative to discuss your specific requirements.
