Attachment #2 to the Party Status Application of N Street Neighbors – BZA Application No. 18780

1. How will the property owned or occupied by such person, or in which the person has an interest be affected by the action requested of the Board?

N Street Neighbors is a group comprised of the owner/residents of twenty-five (25) homes in the area of 2709-2715 N Street, the address which is the subject property (the "Subject Property") for BZA including to the west, the east, and north, many properties directly across the street and on the block, as well as other properties in the legally affected zone of interest. The relief requested proposes creating a residential unit facing the rear of the lot, and increased density over what would be permitted as a matter-of-right. Such relief will have a direct affect on the properties immediately to the east and west of the Subject Property, as well as on the properties to the rear and across N Street.

2. What legal interest does the person have in the property?

Almost all of the group listed in Attachment #1 are owners of their respective residences.

3. What is the distance between the person's property and the property that is the subject of the application before the Board?

Members of the group include all immediately adjacent neighbors. The neighbors on the east side of the church are literally 3 - 4 feet from the church structure. The group members own properties in the subject square or on the subject block.

4. What are the environmental, economic, or social impacts that are likely to affect the person and/or the person's property if the action requested of the Board are approved or denied?

The grant of the requested relief will permit an unusual faux pipe-stem lot, additional density without parking, a residential unit fronting on the rear of the property, all of which will impacts on the adjacent neighbors and the community at large, including issues with parking, privacy, and other environmental, social, and economic impacts related to impacts of such relief. The grant of requested relief will also significantly increase the intensity of use at the current site, also directly affecting the properties.

5. Describe any other relevant matters that demonstrate how the person will likely be affected or aggrieved if the action requested of the Board is approved.

The requested subdivision will create an odd situation out of character with the neighborhood and causing additional concerns about excavation and storm water management which might not occur if the Subject Property were used as a matter-of-right.

6. Explain how the person's interest will be more significantly, distinctively, or uniquely affected in character of kind by the proposed zoning action than that of other persons in the general public.

As explained above, the members of the N Street Neighbors comprise almost all of the properties in the surrounding area of the Subject Property, including immediately abutting neighbors. Therefore, these properties are more significantly, distinctively and uniquely affected compared to the general public.
