Subject: case 18785

variance for the project at florida ave.

I support the reduced parking variance,
subject that the
city make available the same square footage at or immediately proximate (200 feet) for
ZipCar, Car2go, and a Bikeshare and that all tenants at the location get half off on
car share subscriptions and a heavily subsidized bikeshare subscription

If Tenants are able to get to Metro quickly as well as easily borrow a car when needed
they won't keep a car, but, the city must make that easy for them.

If the developer wants these inside the facility i would support a reduction in parking slots
inside the building, on a equal area basis. 1 Bikeshare dock and bikes equal to one parking slot,
one car share vs one parking slot, but, i think it's better to make those outside so other people can use them as
well
