My wife Katherine and I live at 16th and R Streets, and have lived in Dupont Circle for more than 10 years. We are writing to express our support of the project at 1108 16th Street, a mixed residential and office building. We support the project as proposed. We think that the proposed building, which is a very attractive design, will contribute much more to the street scape than what is there now. In fact, you can walk by what is there now and never notice it. The facade of the first two floors is a good base for the new construction above and the proportions are right for a 90' building. In summary, we support the project as proposed.
