

I am the owner of a house at 743 Tenth Street SE and the back of my house and garden border the alley on which Richard Parnell proposes to build a garage with a second floor. I am writing in support of the proposed structure. I believe it will be an attractive addition to the alley landscape. Nothing about the design will negatively impact the environment or availability of light to the neighbors. All structural improvements on the alley encourage homeowners bordering the alley to better maintain the rear of their properties. Mr. Parnell has excellent taste and maintains his home beautifully. His garage will be a welcome addition.

Sincerely,

Melissa Hook
