

Photos of 7100 Blair Rd entrance and lobby.

The above pictures were taken through windows alongside the front door of 7100 Blair Rd NW when I knocked to inform the owner of a meeting about his proposal. It appears that at least the lobby portion of Mr Fields's plans has already been constructed. In particular, the lock on the door (see below for enlargement) indicates a separate apartment. According to some neighbors, the apartments have also been completed. The number of vents on the roof (see below) appears to indicate that this is true.

South side – four vents

North side – four vents
