Dear Ms. Travers:

Thank you for responding to my email and your explanation of why we have not been able to communicate. I am so sorry that your name and contact information as the ANC for Ward 7F06 have not been accurately published in the public records as it should have been. I fully understand that this was not through any fault of your own.

Our meeting by telephone was such a pleasant experience, and I want to thank you for being so willing to discuss my application to convert the 2nd floor of 3536 Minnesota Ave SE to a nonprofit office to provide services in the community. Having discovered that you are virtually a next-door neighbor (more like a around-the-corner neighbor) I was excited to know that you are fully aware of the needs that we are seeking to address with the non-profit organization. Now, we have a direct point of contact with whom we can freely collaborate to structure and to implement much needed services.

Our discussion about the need for a Senior Computer Literacy Class has excited me tremendously because it is one of the things that I have wanted to do for such a long time. Being a senior myself, I understand how important and how useful it is to be able to do business online without having to leave my home. It has long been my desire to provide this kind of opportunity to seniors living in the disadvantaged areas of our city, and in Ward 7 specifically.

I shall make sure that you receive all documents pertaining to the plans and programs that we will be discussing once the zoning variance has been determined. I am prayerful that it will be a positive review so that I can begin to implement the many social services that are planned for the community through the nonprofit organization.

Again, thank you for your energy that you bring to the community and I am looking forward to working with you for the betterment of our community in Ward 7.

Sincerely,

Dr. Judy Fisher
Dr. Edward G. Fisher, M.D.
