Washington, D.C. 20001**

Chair and Members of the Board:

Pursuant to its authority granted under DCMR 11 § 1202 and, in particular § § 1202.1 and 1202.3 to review and report on Special Exceptions in the Capitol (CAP) Interest Overlay District, the **Architect of the Capitol** has found that the proposed relief requested under section § § 223, 403.2 for a two-story addition (which eliminates a non-conforming open court) to an existing row dwelling at 333 F Street, NE, that does not meet the lot occupancy under DCMR 11 § 403.2, **is not inconsistent** with the intent of the CAP/R4 District (Overlay) and **would not** adversely affect the health, safety, and general welfare of the U.S. Capitol Precinct and area adjacent to this jurisdiction and **is not inconsistent** with the goals and mandates of the United States Congress as stated in DCMR 11 § 1200.1. The **Architect of the Capitol** has no objections to this application. **The Applicant, however, is still responsible for meeting the burden of proof associated with the relief requested and consistency with general intent of the Zoning Regulations and should provide the Board with adequate testimony that the addition has little or no impact on the adjacent neighbors.**

Sincerely,

Michael G. Turnbull, FAIA  
Assistant Architect of the Capitol
