

I have talked with the Trieus about their plans to renovate their dilapidated shed. I understand that they wish to expand the footprint of the current shed. The proposed accessory building and home would occupy approximately 48% of their lot area. The existing shed and home currently occupy approximately 41% of their lot area. They are therefore asking permission from the Board of Zoning for a special exception.

I support this project.

Furthermore, the Trieus noted the revisions to the zoning regulations set to take place in September 2016 regarding accessory dwelling units as it relates to their renovation. I am aware that in the revised zoning regulations, the accessory building could be converted into an accessory apartment by right, subject to certain access and use criteria.

I support this project.

Furthermore, the Trieus noted the revisions to the zoning regulations set to take place in September 2016 regarding accessory dwelling units as it relates to their renovation. I am aware that in the revised zoning regulations, the accessory building could be converted into an accessory apartment by right, subject to certain access and use criteria.

I support this project.

 (Titman Woessgen)

I have talked with the Trieus about their plans to renovate their dilapidated shed. I understand that they wish to expand the footprint of the current shed. The proposed accessory building and home would occupy approximately 48% of their lot area. The existing shed and home currently occupy approximately 41% of their lot area. They are therefore asking permission from the Board of Zoning for a special exception.

I support this project.
