To BZA Board Members,

I oppose the granting of a variance for application #18992 for address 1015 E Street SE. As the property owner of 509 11th Street, I believe this project will have a negative impact on our community. Not only will it decrease natural light to properties on 11th Street it will also increase congestion in the area during and after construction. This project will also negatively effect the esthetic and character of the neighborhood by constructing a large, tall wall which would not fit in with the rest of the properties. Once again I oppose a variance for this project because I do not believe it brings any benefit to the community, in fact I believe it would be detrimental to the community.

Thank you,

Terry Victor
