

Dear BZA Board,

I am writing to you to express my dismay and my opposition to the proposed variance number 18992 at 1015 E street SE.

The proposed new structure totally destroys the reason that we the residents have chosen to live in an historic neighborhood. Our lives are healthier because of the building codes imposed within the historic community. Our light, air flow, and green views are needed to allow for a healthy balance in everyday life. Removal of green space is a total negative impact on all of us.

I further believe that the new future residents of 1015 E St. SE would much rather have a well developed green space in the rear of the building in which to enjoy and share time with neighbors and friends. Nothing is better than to have moments in a well developed garden space which relieves tension and adds immensely to the quality of urban life.

This proposed wall will also endanger the safety of residents for access to emergency equipment such as ambulance and fire !

PLEASE do not allow this proposed new structure to ruin the quality of our lives in this beautiful city in which we have chosen to live.
