Washington DC

RE: Permit Application B1412279

To whom it may Concern :

This is to inform you that we intend to renovate our kitchen in our 1930's DC home for the purpose of modernizing the kitchen, expanding the square footage from approximately 100 square feet to 210 square feet and we intend to use it as kitchen and dining space. We are installing an island, and in the accessory addition, skylights for better light and ambiance in the room.

This statement is to verify that we have contacted our local ANC and are scheduled for a review of our request for April 27th, 2015. We have met with the ANC Chair who has come to our home and reviewed the plans (same as submitted here), and has a full grasp of the proposed addition and the impact.

Further, we have submitted requests for support to all neighbors within 200 feet of our property corners and have received more than 75 percent of them back, and all support our application. These letters of support are also submitted along with this letter.

When we meet with the ANC this Monday, we will find out if there are any other groups affected or who should be contacted and will do so within the week.

Sincerely,

A handwritten signature in black ink that reads "Martin Block". The signature is written in a cursive, slightly slanted style.
