Andrew, I have no objection to you building a deck to the same depth as 1005 F Street NE. We went through a great deal to have the deck approved. Good luck. Julie

Julia -

I hope all is well with you and you got your basement back to sorts. Our company paid our claim, but I understand Nationwide denied yours? Sorry about that.

Board of Zoning Adjustment
District of Columbia
CASE NO.19064
EXHIBIT NO.13

I have what I hope to be is a quick favor from you. We are looking to build a deck on the back of our house, identical in size to the one you have. The city is saying we need a variance to build one of that size. It will only approve one several feet less in depth than what is on your house and the house at 1001 F St. Both of them are the same depth, and we'd like ours to be that size as well. We're working with Fowler Architects (www.fowler-architects.com) to build the structure. Ms. Fowler asked if I would reach out to neighbors to see if they would e-mail me a statement saying they do not object to us building the structure. Would you be willing to send me something to that effect? I'm happy to share the plans with you once they are finalized if you're interested. But, the deck's size would be identical to yours. Thanks for your help.

Andy
