

Dear Sir/Madam: My name is Patricia Watkins and I reside at 1369 Quincy Street, N.W. I am concerned about parking. There is one large apartment building (around 5 stories) that has been built across from my house. We already have a parking issue in this area. I was told by one of the builders that there is no parking in this new building for those tenants once occupied. My understanding is that there is also another 4 story building slated to go up near the corner of 14th and Spring Road. I want to know where everybody is going to park. Before erecting buildings, the zoning commissioner should ensure that parking will be provided for tenants within that building since we already are scrambling for street parking. Please look into this matter. We cannot afford more cars on already crowded streets. Thank you!
