Dear Ladies and Gentlemen of the Zoning Commission,

I frankly cannot believe that I'm still having to defend the unit block of W street against these egregious popups, after the 42W street monster popup debacle and after the hard won victories against these monster popups only a few weeks ago. Are we really going to have to battle each developer who submits a request to popup and popback beyond the regulations that were JUST voted into law?? When do the laws that we enact actually take effect and pertain to everybody and not just those who constantly seek to circumnavigate them to make a buck? Are we are home owners truly protected?

This block and this neighborhood has suffered enough from egregious popups at the hands of Anex Moraes and A/X carpenters, Beasley, and other unscrupulous outside developers seeking to make a buck without regard for our homes or our streetscapes.

I would appreciate you voting to decline the requested 64 W street zoning variance on behalf of 28th street partners LLC.

Thanks,
Todd Crosby
20 W street NW
