

Hello,

I am writing to voice my concern about this developer (see subject line) having paved over public green space at the corner of Rhode Island and 3rd St NE to use for private parking at his new development (2112-2126 3rd St NE).

Green space in this northeastern portion of Eckington is quite limited, and will be particularly needed in the coming years since this area and the block to its east (several huge new mixed use developments at 4th and RI) will be getting so much more dense in the next 3-10 years.

I hope you will BZA will investigate this issue thoroughly and reclaim our public green space if has indeed been improperly taken over by this developer.

Thank you very much for your assistance.

Best,

Janet Lewis
