Members of the Board:

Please help us neighbors and citizens, to encourage less parking, less driving, and less desecration of green space in our city, by disallowing the Special Parking Request in this situation.

We are thrilled to see more density, diversity, and life in our part of town. As part of that, we would plead with the Office of Zoning that in every possible case, developers be rewarded for including only minimal parking, if any, in their projects.

I am deep into middle age. My wife and I happily get to work, shopping, friends, and church via bicycle, foot, and Metro, in all weather. For trips to see family, we can easily rent a car a few blocks away.

Many thanks, in any event, for your longstanding good work.
