William,

Thank you for sharing with me the plans to renovate the attic of your house. The renovation includes removing the existing roof and building a "pop up" addition to include a family room & roof deck, all within the existing façade so that it will remain hidden from the street front.

Since we share a common property line, I wanted to formally put in writing that I feel the "pop up" addition you have shown us will be aesthetically pleasing. I think that the renovation will also increase the value of our property and those nearby.

If we can be of any further assistance while you move forward with the special exception process, please let us know. I wish you the best with the renovation.

Sincerely,

Geraldine J. Whitley
