

ANC, Community, Office of Planning

We have contacted our ANC 1B02 rep Ellen Sullivan and had her over to the house to show her the existing structure and discuss the proposal. We also submitted our initial plans to the ANC architectural committee and attended a follow-up meeting on July 20. They received the proposal well but said they couldn't make an official assessment until we have addressed the need for the variance.

We have discussed the plans with our neighbors at 1814 and 1818 Vermont Avenue and both have fully supported the proposal and stated their support in writing. We have also acquired a list of addresses for homeowners within 200 feet and are submitting that list with our BZA application.

We have talked extensively with the Office of Planning's Historic Preservation Office. They too responded positively but stated that they would not make a final assessment until after the variance had been processed.
