Subject: Case 19450

To the members of the Board of Zoning Adjustment: I am asking you to vote against the city's request for waivers for building a larger homeless shelter on Idaho Avenue next to the police station. I was initially in support of the city's original plan for a homeless shelter but I feel that the city is taking advantage of my community's good will by proposing a structure out of character with the neighborhood, housing many more families than originally proposed. Building a larger structure than originally proposed means further encroachment in the neighborhood while the building is under construction. Just because the city owns the property does not give them the license to to risk the good will of the community by imposing upon it a totally unsuitable building nor disrupting the character of the neighborhood. And as a taxpayer I ask, where is the money coming from? Jean P. Moore, 3440 39th St NW, Washington, DC 20016 202 244 7770
