Good day,

The proposed building is an eye sore; it does not conform to a historic area and if this was any other neighborhood in DC I am sure that this would not be an issue.

Frankly, I am tired of the lack of consideration involved with any and all projects in the Anacostia neighborhood of DC.

This is a community of people that are raising families, working and need a place to park. Be considerate and think about what has been dumped in this community for far too long....listen to the neighbors they live there!
