Subject: Zoning Special Exception request for 3629 T Street, case # 19633a

Dear BZA,

I am writing to oppose the request for setback relief for a front vestibule requested by the developers of 3629 T Street NW, case 19633a. I am opposed to any further adjustments to this property that will make the front façade different from the other houses on the block.

I was appalled that the voices of several Burleith residents who attended the early December BZA hearing and the 35 letters against the development of 3629 T Street held no weight for your final decision that favored the developers over the neighbors. Only one person, an absentee landlord, wrote in favor of this. How is it possible that the opinions of so many neighbors were so easily dismissed in favor of people who don't even live in Burleith? Don't District residents deserve a fair shake and support from city agencies to maintain their neighborhoods?

I urge you to oppose this special exemption request. I want to continue to live in a neighborhood that is harmonious in its architecture and harmonious with homeowners who respect each other and the neighborhood's character.

Thank you for your consideration.

Sincerely,
Stacy Davis
