Subject: Case 19689–Meridian Development

We resident's of Beekman Place have repeatedly objected to this proposed development and ask, no we beg, you to stop the developers from moving forward. Not only does the proposed development not adhere to the historical architecture of this valuable DC area, but the addition of so many units in a high rise configuration, the absence of planned green spaces, the congestion on Belmont Street and 16th St., the heavy equipment used during construction, the depth to which the garage will be dug, the noise, the proposed traffic patterns that will impede traffic flow and endanger pedestrians on three streets (16th, Belmont and Crescent Pl), and the purpose of using the proposed convention center in such a small area with buses dropping off and picking up diplomats on a regular basis are not in keeping with the area's ambiance and are certainly not conducive to fitting in with the rest of Meridian Hill. You are the "keepers of the gate" to make sure this planned development does not come to fruition, so please reconsider approval and help those of us who have lived here since 1973. Sincere thanks for your consideration.
