Boys & Girls Clubs of Greater Washington
Mary and Daniel Loughran Clubhouse #10
PARENT ASSOCIATION PROPOSAL
The Next Level of Achievement

Rationale

The preparation of high school students for their post-secondary experiences is one of the objectives of our Education Initiative. Through our nationally recognized programs, our teenage members already participate in daily academic assistance, goal-setting and job skills programs. Your partnership with us would enable us to expand the numbers of teens participating and enable us to deliver a more comprehensive educational program, specifically designed for our high school members at the Mary and Daniel Loughran Clubhouse #10.

Goals

With additional money to support our educational initiative for high school members, we anticipate:

- Increased participation of members aged 16-18 in the education initiative
- At least ten club members will take the SAT test in the spring of 2006
- At least five club members will send a completed college application to at least one college of their choice.
- At least five club members will be interviewed for a job.

Program Overview

Teens will participate in a comprehensive 3-6 month program that includes:

- **SAT Prep and Coaching:** Members will attend at least one three-month session during which they will learn test-taking strategies, vocabulary, reading, writing and math strategies appropriate to the SAT examination. Some instruction will be done on-line.
- **Goals for Graduation:** Members will make long and short-range personal, educational, and career goals as it applies to their post-secondary life. Members will use internet for college, scholarships, and job searches.
- **Job Ready:** Members will learn effective job-hunting techniques (appropriate dress, interviewing skills, and resume writing) and skills that will help them be successful once on the job.
- **Field Trips:** Members will travel to job sites and visit college campuses so they can get a "real" view of post-secondary opportunities.

PARENT ASSOCIATION PROPOSAL
Summer Camp Field Trips

Rationale

Summer Camp at the Mary and Daniel Loughran Clubhouse #10 has always been a rewarding experience for our club members. Last year our campers had a few opportunities to visit museums and other places of educational interest. But because funding was lacking, we were not able to provide our campers with a variety of educationally enriching field trips. Your partnership with us would enable us to begin planning now for more educational field trips for Summer Camp 2006.

Goals

With additional money to support our field trips, we anticipate that every camper will experience at least 3 educational and/or culturally field trips, one of which will be an overnight trip. We will plan trips such as:

- Docent led visits to Smithsonian exhibits at the Natural History and Air & Space
- Baltimore Aquarium
- Holocaust Museum
- Black Wax Museum
- Overnight trips to New York City to see a play or other cultural event

Budget:

Transportation and Admission Fees - $10,000
