Reg. case # 05-42

2/19/07

I am very much in favor of the proposed Medical Building being built on the Sibley Hospital grounds. When I am at my Dr's office and need a test or X ray, I must leave the office and go to Sibley for the test etc.

I am 73 yrs old and this can be a real hardship on me. Since my Dr's usually refer me to Sibley, I am sure they would like to have their office close to the hospital. Being close would mean test results would get to my Dr sooner.

The Dr's would benefit by saving time between making rounds at Hospital + getting to their office

Thank You.
