Subject: request for meeting

Adele Harrell to Jerry Price at Sibley, May 23,

On behalf of the Sibley Neighbors for Responsible Growth I am writing to propose a meeting to begin a dialog with community members on Sibley's plans for development of a medical office building. Our group would like to find a way to have discussions in advance of a resubmission to the Zoning Commission about how your development could be designed to address the needs of both the neighbors and the hospital. In particular, we would like to explore priority concerns for the community and how those might be addressed as well as the question of whether Sibley will entertain alternative development plans. The meeting could be large or small depending on your preference.

Jerry Price to Adele Harrell, May 25

This summer we are focusing on several major hospital projects. In the fall we will turn our attention back to the Medical Building. Our goal is to build a Medical Building that will provide convenience for physicians, patients, and families. The project will reflect many of the comments offered during extensive outreach with neighbors, neighborhood groups, and agencies.

At a later date, we will go before the Zoning Commission and ask for a vote. We appreciate the support we have received from the majority of the neighbors and neighborhood groups. I will respond to you request this fall when our position is developed. Thank you.

Jerry Price, COO
Sibley Memorial Hospital
