Carol J. Mitten, Chair
DC Zoning Commission
441 4th Street, NW Suite 201 S
Washington, D. C., 20001

RECEIVED
D.C. OFFICE OF ZONING
2006 SEP 14 PM 12:05

Dear Ms. Mitten:

During the development of the new Foggy Bottom campus plan for the years 2006-2020 the Physical Facilities Committee of the George Washington University Senate has received regular updates with the opportunity to ask questions and provide input. In addition, the chair of the committee participated as the faculty representative from the Senate during the planning for the development of Square 54, the old hospital site. We are satisfied that the University has engaged in a comprehensive planning effort to fully explore and evaluate the future development of the Foggy Bottom campus. This planning effort has included input from all interested stakeholders. The new Foggy Bottom campus plan accommodates G W's forecasted academic and student housing needs within the boundary of the Foggy Bottom campus. Thus, the Physical Facilities Committee whose membership includes faculty, administrators, a student representative, and staff is in complete support of the plan.

Sincerely and on behalf of the G.W.U Physical Facilities Committee,

Linda L. Gallo, Ph. D.
Professor of Biochemistry and Molecular Biology
Chair, Physical Facilities Committee
