City Council Hearings for GWU Campus Development
Ellie Khani ,Owner , Karma Bar & Lounge

I have owned and operated Karma Bar & Lounge at the corner of 19th & I streets NW, since January 2004. During this time I have had numerous interactions with GWU community of students and faculty.

For the past year I have been involved in the start up of the Foggy Bottom West end business association which aims to support the growth of small businesses in our area, as well as provide a long term forum for discussion of local issues which effect business growth and operation.

I have been acquainted with the GWU campus plan process and have been following it closely. I endorse it , because I think it is going to be great for our small business community , and Washington DC at large .

Development of the campus plan , will mirror Washington DC's pursuit of excellence as Nation's capital , and provide what the GWU student population wants , more and better facilities.
