To the Zoning Commissioners:

You will find attached a copy of the content of a message I sent to Fred Siegel at G.W. just over a week ago. I can update it by saying that yesterday's downpour caused absolutely no problems.

I share my neighbors' concerns about the effects of the proposed new Pelham construction on waste water management, but my experience over the past few years with Fred Siegel's office provides a basis for confidence regarding cooperation in the future. We live in a "topographically challenging" area that requires all of us to work together; I look forward to working with G.W. to ensure that the water management issues are addressed.

Yours sincerely,

Maxine Weinstein

Content of message sent from Maxine Weinstein to Fred Siegel on 21 June 2007

Dear Fred,

Just a quick note to say "thank you" for your very effective efforts in keeping the area surrounding the headwall mucked out. We had a massive amount of rain on June 13, but I didn't see any flooding. In fact, I was flying in from Boulder and was told that Dulles had been closed because of the weather, and then after I got home it started up again and just kept pouring. I also saw your ground crew out early Wednesday morning after it rained overnight on Tuesday. It really makes a difference and I want you to know how much I appreciate the vigilance. These days I'm struggling with raccoons and deer, but not with flooding. Thank you.

Cordially,
Maxine
