Petition Demanding that Construction Traffic NOT Use Local/Residential Streets

Upcoming construction projects at St Paul's College and CUA's South Campus are in the planning and nearing approval stages. If allowed to proceed as planned, they will use the local/residential streets along 7th Street as the construction entrances for these projects. This petition is to inform the developers, the property owners, the DC agencies with approving authority, and our local elected leaders that the residents abutting these projects demand that construction traffic enter the St Paul's project exclusively through 4th Street NE, and enter the CUA South Campus project exclusively from Michigan Ave and/or Monroe Street. **We demand that 7th, 5th and 6th Streets NOT be used for construction traffic.**
