RE: ZC #08-15 (Friendship Shopping Center, 3336 Wisconsin Ave NW)

We are submitting herewith for your consideration the attached letter signed by 168 neighbors of the subject proposed PUD development. We are all knowledgeable about the proposal and many of us have attended one or more of the meetings that StreetWorks, the project's designer, has had with the community. We all share the concerns expressed in the letter.

We did not seek out everyone in our neighborhood, but found that many neighbors were eager to sign this to make their concerns known. A memo describing some specific concerns and a diagram showing how the proposed development compares with the existing commercial area is attached, to indicate aspects of the redevelopment as we understand it to be.

We look forward to participating in the hearings that will be scheduled and hope that some modifications will be forthcoming to make this a project we can all support.

Thank you for your consideration.

ZONING COMMISSION
District of Columbia

CASE NO.

EXHIBIT NO.

SIZE

The proposed PUD covers most of two city blocks, between Cactus Cantina and Idaho Ave. On the south block, the new Giant will be three times the size of the existing store. With 56,000 sf, it is a "super store" according to Stop & Shop's website; as such, we assume it is designed to attract shoppers from a much larger area than the 1-mile radius intended for "neighborhood shopping" under existing zoning.

The proposal includes over 1000 linear feet of street level retail space in addition to the food store. On the south block, 25,375 sf of new space faces Newark St and Wisconsin Ave. and 8 new townhouses face Idaho Ave. On the north block (Newark to Idaho), the 5-6 story building will house 124 apartments with street level commerce below. Linear street frontage for first floor commercial space on the north block appears to be about twice what it is now.

USE

The community wants a diversified commercial area with a variety of neighborhood-serving shops, but this plan does not encourage that goal.

By offering many kinds of food products and non-food items as well, the new Giant super store is designed to be a one-stop shopping destination. Independent retailers offering similar products will be discouraged from renting nearby stores.

Developers have said they will not limit the number of bars, restaurants, and other food-serving establishments in new retail space. Without guarantees limiting such use, and considering the high rents that restaurants and bars can pay, other retail may not be able to compete for space.

TRAFFIC

Giant expects shoppers from a wide area to use it for major shopping, which requires cars; few shoppers will actually carry home many grocery bags on foot, bicycles or bus.

Traffic is heavy on Wisconsin Ave already. Residential streets at and near the development area (Woodley, Macomb, Newark, Ordway and Porter) carry east-west traffic and provide access to the many schools in the neighborhood that enroll thousands of students. Traffic will increase significantly if this large project is approved.

Traffic management issues exist on our residential streets already, which will only worsen with the large development. (Macomb, the only street connecting Massachusetts and Connecticut Avenues, is already congested. Porter St is a designated truck route and carries a steady stream of vehicles. Newark St and 38th St west of the Giant are used by drivers to avoid congestion on Macomb St.)

PARKING

The proposal's parking facilities are not adequate. The number of spaces provided for the foodstore, other retail, offices and apartments is less than required

There is no parking for patrons or employees of commercial space on the North block; the underground garage on this block provides one space for each apartment only.

Parking is already tight in the redevelopment area, in McLean Gardens and on some residential streets east of Wisconsin. Patrons of existing restaurants on Mcomb and Wisconsin often park densely now on neighborhood streets and also occupy over 100 spaces in the Giant lot on many evenings. The addition of new food-serving establishments will overwhelm our residential streets unless adequate parking is provided. Plans for parking facilities in the new development must take this into consideration.

ZONING

The PUD proposed is not consistent with the Comprehensive Plan for a neighborhood shopping district. It greatly exceeds the limits of the current zoning and the Macomb-Wisconsin Neighborhood Commercial Overlay District. For example,

- FAR proposed for the north block is 3.8 while the current zoning limit is 1.0.
- The 5-story height of the north block building is out of line with the generally low-scale of existing buildings, which includes those in the Cleveland Park Historic District and McLean Gardens.

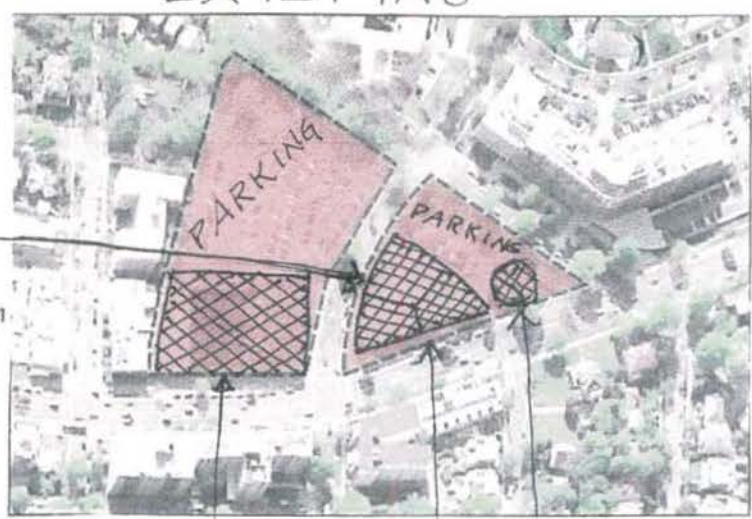

On the South block, truck access to loading facilities from Idaho Ave. are adjacent to existing residences, in violation of the residential zone.

The supposed "benefits" required for approval of a PUD – to justify up-zoning – are disingenuous at best:

- The new foodstore is an essential part of the development and cannot be also described as a "public benefit" or "project amenity".
- Mitigation of negative impacts of increased traffic and parking cannot be considered "benefits" as they should be required for approval of any development.
- Greenspace – indeed any open space – on the development site is scant, and most appears to be in city treeboxes. There is greenspace nearby on the Cathedral Close, at Rosedale and in McLean Gardens.
- "Green building" standards cannot compensate for air and light pollution, increased noise and traffic.
- This area is not an "economic development area". High property values in our residential neighborhoods already provide significant tax revenue, which may be diminished by excessive commercial development nearby.

FM: Wisconsin Avenue Giant Neighbors

We are familiar with the plans for redevelopment through a Planned Unit Development of the Friendship Shopping Center in the Macomb-Wisconsin Neighborhood Commercial area. We welcome a new and improved grocery store and a revitalized commercial area. We want a plan we can support, one that can be approved without opposition. But before this goal can be achieved, our concerns in a variety of areas must be addressed.

These important concerns have to do with the overall size of the project, the requested zoning changes, the negative impact of traffic and parking, and uses in the new commercial space.

We urge the applicant to be sensitive to the nature of the well-established neighborhoods on both sides of Wisconsin Avenue where this project will have a very great impact. We urge the Zoning Commission to ensure

- that the plan is reduced in size to minimize the negative impact on our community;
- that it honors the intentions of the Comprehensive Plan and existing zoning for a neighborhood shopping district;
- that it includes a variety of neighborhood-serving businesses, with limits on bars, restaurants and fast food in keeping with the existing zoning Overlay;
- that a plan for adequate parking and traffic management for the entire commercial area and neighboring residential streets is in place before the redevelopment is approved.

We are familiar with the plans for redevelopment through a Planned Unit Development of the Friendship Shopping Center in the Macomb-Wisconsin Neighborhood Commercial area. We welcome a new and improved grocery store and a revitalized commercial area. We want a plan we can support, one that can be approved without opposition. But before this goal can be achieved, our concerns in a variety of areas must be addressed.

These important concerns have to do with the overall size of the project, the requested zoning changes, the negative impact of traffic and parking, and uses in the new commercial space.

We urge the applicant to be sensitive to the nature of the well-established neighborhoods on both sides of Wisconsin Avenue where this project will have a very great impact. We urge the Zoning Commission to ensure

- that the plan is reduced in size to minimize the negative impact on our community;
- that it honors the intentions of the Comprehensive Plan and existing zoning for a neighborhood shopping district;
- that it includes a variety of neighborhood-serving businesses, with limits on bars, restaurants and fast food in keeping with the existing zoning Overlay;
- that a plan for adequate parking and traffic management for the entire commercial area and neighboring residential streets is in place before the redevelopment is approved.

FM: Wisconsin Avenue Giant Neighbors

We are familiar with the plans for redevelopment through a Planned Unit Development of the Friendship Shopping Center in the Macomb-Wisconsin Neighborhood Commercial area. We welcome a new and improved grocery store and a revitalized commercial area. We want a plan we can support, one that can be approved without opposition. But before this goal can be achieved, our concerns in a variety of areas must be addressed.

These important concerns have to do with the overall size of the project, the requested zoning changes, the negative impact of traffic and parking, and uses in the new commercial space.

We urge the applicant to be sensitive to the nature of the well-established neighborhoods on both sides of Wisconsin Avenue where this project will have a very great impact. We urge the Zoning Commission to ensure

- that the plan is reduced in size to minimize the negative impact on our community;
- that it honors the intentions of the Comprehensive Plan and existing zoning for a neighborhood shopping district;
- that it includes a variety of neighborhood-serving businesses, with limits on bars, restaurants and fast food in keeping with the existing zoning Overlay;
- that a plan for adequate parking and traffic management for the entire commercial area and neighboring residential streets is in place before the redevelopment is approved.
