

**Zoning Commission Case 08-21, the proposal by the Athena Group, LLP
for a consolidated review of a proposed Planned Unit Development
and a map amendment for square 1356,
4460 MacArthur Boulevard, Northwest
March 16, 2009**

I have three questions in the "Preliminary Matters" department.

1. Will Advisory Neighborhood Commission 3D be able to ask questions this evening about the submission of March 13, 2009?
2. May the ANC provide written comments about the discussion that takes place this evening?
3. After reviewing the transcript of the hearing on February 12, 2009, I have three changes.
 - a. To Commissioner Jeffries, when I responded (on page 217) that there were no four-story apartment buildings in the neighborhood, but there were three-story apartments with "basements," I should have said "cellars," the term that Zoning Regulations use for floors whose windows are less than four feet above ground.
 - b. I want to say that if Mr. Feola asked (on page 242) whether I considered the open space as portrayed in the application for Canal Parc to be comparable to the open space for the Canal View community next door, my answer should have been no. If my answer was yes, I misspoke.
 - c. On page 163, the transcript does not mention "Greenwich" as in Greenwich Parkway, a street in Foxhall Village.
