6 January 1999

TO: BZA
Subject: MedLink Hospital's Application for additional beds
From:
Marshall Williams
Former ANC Chairman ANC6A
Former ANC Commissioner 6A-08

Unfortunately, due to time constraints relating to my employment, I will be unable to present this testimony in person.

Having served as Chair of ANC6A for two terms, and chair of the Zoning Committee for ANC6A I believe that I have a perspective on the application before you today.

In my experiences dealing with various entities that have made applications for adjustment to the certificates of occupancy, licensing, etc. they are often based purely on personal/company interests. In the case of MedLink I have found them, while serving as a profitable enterprise, to be far more willing to listen to the concerns of their neighbors - the residents in the surrounding area - and to make adjustments needed in the course of their business to address the concerns of their neighbors.

They have attempted to placate the wants, needs, and desires of their neighbors. However, certain elements in the neighborhood have failed to give them credit for their contributions to the quality of life in their immediate neighborhood. And there have been several occasions when these elements in the neighborhood have attempted to thwart the adjustment or zoning considerations of MedLink; more often than not the basis for this lays in "agreements" made with previous owners of the site. MedLink has, in my experience, been willing to accommodate these "demands" as much as was feasible. However, to make MedLink adhere to and be accountable for agreements between the neighbors and the former owners is both impractical and self-serving of the elements in the neighborhood.

I would draw your attention to how they, MedLink, has made contributions to their neighborhood by both the physical aspects (new plantings, signage, etc.) and contributing to health and welfare of the neighbors. These actions were taken by MedLink without concerns for the cost or profit margins.

As a long-time resident of the Capitol Hill area, as a former ANC Commissioner and former Chair of ANC6A I am in full support of the MedLink application.

Sincerely,

Dr. Marshall Williams
