Board of Zoning Adjustment

Re: Application Number 16550

Dear Sir or Madame:

I write to voice my strong objection to the variance application filed by Stacy Hamblin. I do not believe that the construction of ten single family homes would be sound from either an environmental or community perspective.

Parking is already at a premium on Webster Street. Even if the proposed town homes had parking garages, their addition would significantly burden the problem. Many of my visitors spend too-long already looking for parking. In addition, I have heard from many of my neighbors that the proposed townhouse design significantly differs from the style and size of the turn-of-the century homes. This would create an unnecessary eye-sore. Finally, I believe that the amount of open-space in the neighborhood should be conserved to decrease congestion, traffic, and overcrowding. I propose that the lot be purchased from the owner and that the lot be transformed into a park for all the neighborhood to enjoy.

Thank you for permitting me to voice my strong opposition to the proposed development.

Sincerely yours,
Kelly Barr
