3/1/00

Please use this opportunity of the proposed field School move to review the safety of foxhall Rd. Having lived in this neighborhood for several years, I can assure you that driving on foxhall Rd is terrifying. Drivers consistently run the light at Canfield and a number of left turns onto foxhall are death-defying to all concerned, due to inability to see oncoming traffic. I once saw a carload of upper school students shoot into the intersection, making a left turn onto foxhall, without stopping. They are alive today, I suppose, only by the grace of God. Please, I urge you not to inflict on this already dangerous road additional teenaged drivers and all the others the proposed school would require.

DISTRICT OF COLUMBIA
00 MAR -1 AM 10:

District of Columbia
CASE NO.16559
EXHIBIT NO.48

What a tragedy it would be if someone were killed or injured as a result of so much additional stress put on this already extremely dangerous road. Do you want to be responsible for that?

I expect you will do the responsible thing and carefully review this situation.

Along with so many others familiar with the risks, I oppose allowing the field School, or any other school, to move to Foxhall Rd.

Thank you for your attention.
