R: Application # 16565

A written response to the application of Georgetown University pursuant to 3104.1 for a special exception submitted as neighbors of Georgetown University and as residents of The Cloisters West:

Current Immediate Recommendations to the University for the Benefit of Cloisters West
(whatever the determined usage of St. Mary's Hall)

1) That the path be closed on the east side of Darnall and St. Mary's Hall en route to Reservoir Road. Students Road would walk around the west side of Darnall and St. Mary's.

2) That the path be replaced with a "forest" of tall, dense evergreens and protected by a 12' wrought iron or other such tasteful kind of high fencing. Thereby, this forested space would serve as a sound and aesthetic boundary between Georgetown University and The Cloisters West.

Respectfully submitted,

Ellen Baker John Doolittle
