2903 Mills Avenue, NE
Washington DC 20018

January 10, 2000.

STATEMENT OF EXISTING AND INTENDED USE OF THE BUILDING.

Currently, this building located at the above address, and which has as many as 9 bedrooms and large sitting/family spaces is residence for two people and a home office. The entire ground floor is available.

The intended use is to allow a non-profit organization based here in DC to use the ground floor as its office base. The organization does outreach programs for youth and families in the area. The organization is currently planning youth/family programs to be held on the grounds of Langdon Park, right across the road from this house.

The presence of the organization will definitely bring so much blessing to the neighborhood and its children/families, and it is for this reason that I am willing to let the entire ground floor of this building be used by the organization.
