Re: BZA Appl. Case No. 16611: Proposed Edmund Burke Expansion

As the parent of an Edmund Burke School graduate and a resident of the District of Columbia for 36 years, I ask you to support Edmund Burke's expansion plan.

We are fortunate to have a school like Burke in our community. The school serves a diverse body of students and shapes young people in positive ways that go beyond a strong curriculum. The school's rigorous academic program is complemented by its deep commitment to instilling ethics, responsibility, tolerance, and community service in its students. My son's high school experience at Edmund Burke was an extremely positive one for him. We are excited about the school's plans for a stronger arts program, a better library and much needed improvements in the physical lay-out, so learning can continue to flourish.

Because we live nearby, we are sensitive to neighbors' concerns about traffic congestion. Indeed, we live in close proximity to a university, a high school, and two elementary schools, so we can empathize with their concerns about busy streets. However, we believe that schools make very good neighbors and should be encouraged within our community.

We want our children to be safe, and we also want to be respectful of our neighbors' needs for easier transport on their streets. Burke has worked diligently to be responsive to their neighbors' concerns. Through Burke's efforts to engage their neighbors in productive, constructive dialogue over many months, we believe the school has developed a sound and comprehensive plan that will mitigate the neighbors' worries about the expansion. Based on extensive neighborhood input, the school has made significant changes to its plans that will improve traffic flow and relieve congestion on Upton Street at morning drop-off and afternoon pick-up. We have already experienced great improvement, thanks to Burke's hiring of traffic police and a more efficient carpool line.

Your approval of Burke's proposed plan will demonstrate that people can work through their differences to reach mutually beneficial solutions.

Sincerely

S. Bobo Dean
