Plat of Computation w/ House Footprints

Computations for each lot

Landscaping Plans - see Exhibit H

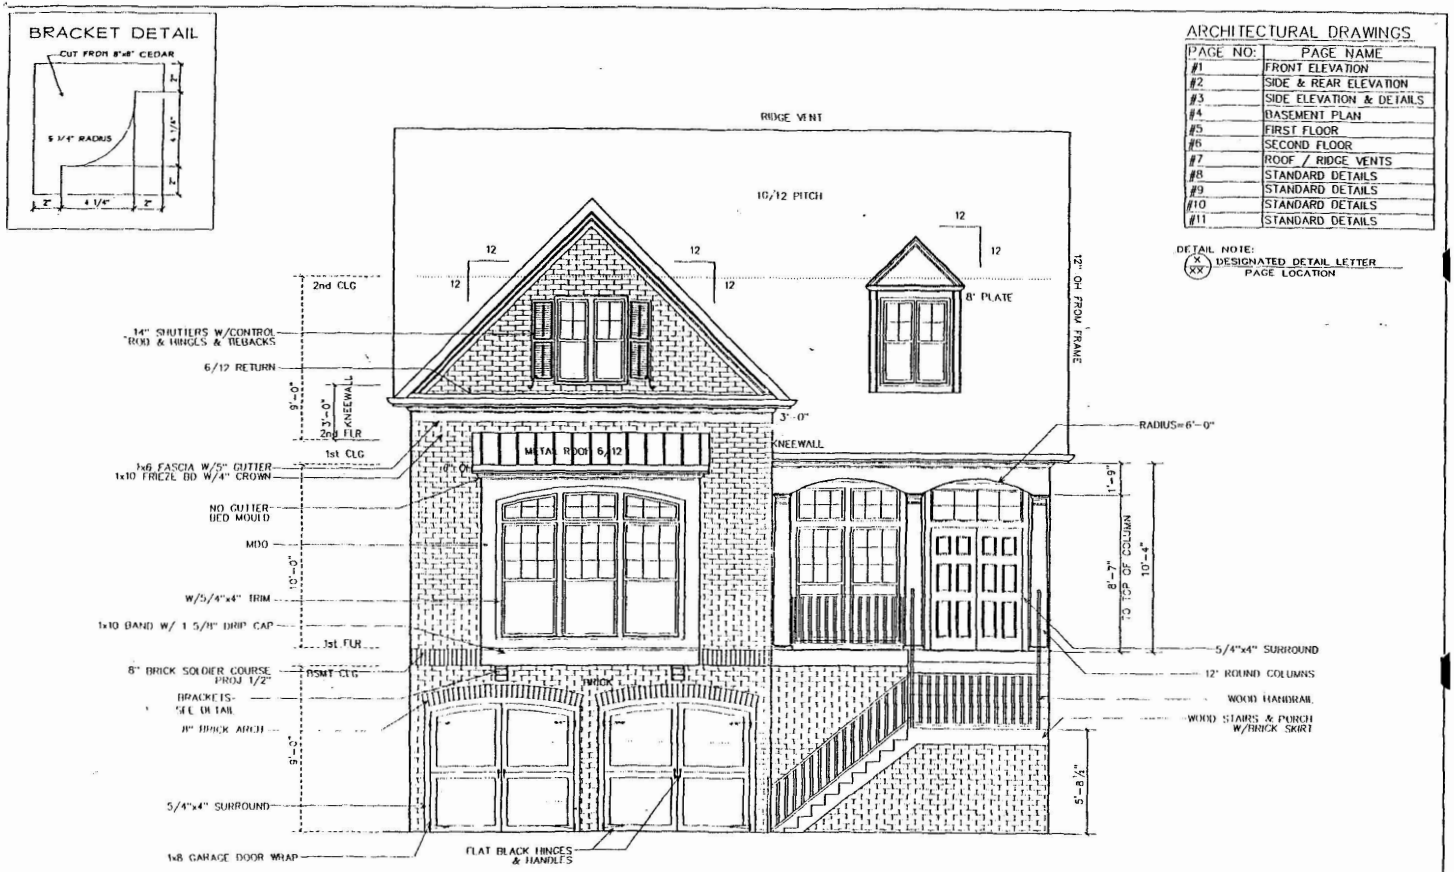

House Plans - Attached is an example of a "typical" plan we would build. Our stated plan is to allow our customers the ability to customize their homes as long as it fits within the buildable area previously noted and all other zoning regulations for R-1-B. Per discussions with BZA staff and from the Zoning Administrator's Office, they concurred that I didn't.

As discussed with members of the neighborhood community, it is our goal to build homes that fit into the character of the Palisades.
