To Whom It May Concern,

This letter of support is in reference to application number 16695, re Robert S.A. Shaeffer. The application is in pursuant to 11DCMR 3104.1 for a special exception to allow an addition to a single family dwelling not meeting the rear yard requirements.

The property in question, located at 2725 13th Street, N.W. is situated directly across the street from my house. I have viewed the plans and am in complete support of the new edition being built as is drawn. The plans are aesthetically and practically very appealing. The style also seems to fit perfectly with the original integrity of the house itself as well as the surrounding homes.

All the neighbors I have spoken to about the project are in favor of approval. It is therefore my hope that Mr. Shaeffer is allowed to proceed with his plans to construct an addition to his home. Mr. Shaeffer's efforts, since the day he moved into the community seem to have been on behalf of not only his personal property, but also to improve Columbia Heights as a whole. I believe that this project would have the same effect.

Sincerely,

Barbara Cameron
