ITEM B—Intended Use

The concession stand will be used to provide food, confectionery items and drinks to the patrons of the Splash Park during hours of operation. The splash park is opened 12NOON-8PM from Tuesday through Sunday. There are no carry-out, fast food restaurants or other means of providing refreshment items to our community in the immediate vicinity of the pool. The pool is for "splash" purposes only and supports mainly our young users. The depth of the pool at the deepest level is 4 feet. We have ample deck area and have umbrella tables, chairs and chaise loungers for parents and guardians there to supervise their children, siblings and friends. Having the ability to provide drinks and other simple amenities to our community is very important to our neighborhood. In all of Ward 8, there is no other facility like the splash-park, which offers a state of the art, safe haven for our children. The children literally spend hours there, everyday during the summer and for most of them this facility will provide their lunch and afternoon snacks while parents are at work.

The Concession Stand will support 2 people who conduct the operations and provide service to the patrons. The concession stand operates on a non-cash basis. Users purchase a "debit card" when entering the park, which they use continually all day. There is no cash needed. We find this method to be safe and easier for the youth to manage and parents' feel better as well, not having to worry about children losing or carrying cash.

The concession stand is equipped to provide small individual pizzas, hot dogs, Popsicle's, ice cream, snow cones, hot pretzels, cotton candy, fountain drinks, popcorn and potato chips.

The concession stand is more than a nice amenity for our wonderful community, it also makes a statement to the children in our neighborhood

that they do not have to travel to Maryland to find the very best; the best can literally be found right in their own backyards! In our entire Ward 8 community, there are no movie theatres, no bowling alleys and in addition to these unbelievable facts, many of the playground areas are unsupervised, ill-equipped and generally unsafe. While conditions in Ward 8 are showing a very positive, upward trend, it will not happen over night and our children are the ones who will suffer during this "catch-up" period. In the interim, we have a created a summer wonderland right here, right now and there is no-waiting! Please help us complete this safe, fun-filled haven for our community by rendering your support to our efforts.

Thank you.
