Re: BZA Case #16753

**I am opposed** to the Special Exception application, BZA Case #16753, that would permit the construction of a monopole (cell tower) in the rear parking lot of the Penn-Branch Shopping Center. A cell tower at this location would negatively impact property values, add to already crowded parking at the Shopping Center, and I am unconvinced that the environmental pollutants emitted from such a facility, would pose no health or safety risks to me or my neighbors.

I believe the BZA should reject this special exception application and explore more reasonable and safer alternatives to erecting a monopole in such close proximity to me and my home.

Re: BZA Case #16753

I am opposed to the Special Exception application, BZA Case #16753, that would permit the construction of a monopole (cell tower) in the rear parking lot of the Penn-Branch Shopping Center, located at the intersection of Pennsylvania and Branch Avenues, S.E.

A cell tower at this location would negatively impact the property values of home-owners living adjacent to and in close proximity to the structure, add to an increasingly crowded parking situation at the Shopping Center, and I am unconvinced by SBA Properties, Inc. arguments that the noise, radiation, and other environmental pollutants emitted from such a facility, would pose no health or safety risks to me or my neighbors.

I believe that there are safer and more reasonable alternatives to erecting a cell tower in such close proximity to me and my home.

Signed R. F. Crockett Date: 10 October 2001

It would seem to me that putting this tower at a shopping center right on Pennsylvania Ave. would not be in accordance with the D.C. Scenic Byways Program which designates Pennsylvania Ave as a scenic byway. Another location should be found for this tower.
