Ms. Jerrily Kress
FAIA Director
Board of Zoning Adjustment
441 4th St., NW STE 210S

Dear Ms. Kress:

The following information supports opposition to the construction of the monopole (cell tower) that is being proposed for the rear parking lot of the Penn-Branch Shopping Center.

There are proven health hazards associated with living, working, playing, and going to school near cellular towers. The radiation emitted from the aforementioned has been known to have effects on the nervous system. This is long term exposure, I am talking.

As mentioned in recently obtained literature from the Occupational Safety & Health Administration (OSHA) and the National Institute for Occupational Safety & Health (NIOSH) there are many scientific and health concerns that remain unresolved.

I am the parent of an eleven (11) year old, and justifiably so, anticipate **late effects** from the proposed construction in our neighborhood.

I am going on **record** as having opposed the **construction of a monopole (cell tower)** for the rear parking lot of the Penn-Branch Shopping Center.

Thank you,

Loretta Nappier
