Re: BZA Application No. 16765
American Chemical Society

Dear Members of the Board:

As the neighboring property owner to the American Chemical Society, the University Club supports the zoning application that has been placed by the American Chemical Society in BZA Application No. 16756.

The University Club is located immediately south of the American Chemical Society Building along 16th Street, NW. We have reviewed the Society's proposal for its patio enclosure. We are also aware of its needs in the building that necessitate the enclosure. Owing to the very small size and the design of the proposed enclosure, the University Club is satisfied that it will not serve any detriment to the neighborhood.

Sincerely,

Albert R. Armstrong
General manager
