Re: BZA Application No. 16765,
American Chemical Society

Dear Members of the Board:

As the neighboring property owner to the American Chemical Society, the National Geographic Society supports the zoning application that has been placed by the American Chemical Society in BZA Application No. 16756.

The National Geographic Society is located immediately across 16th Street, N. W. from American Chemical Society Building. We have reviewed the Society's proposal for its patio enclosure. We are also aware of its needs in the building that necessitate the enclosure. Owing to the very small size and the design of the proposed enclosure, the National Geographic Society is satisfied that it will not serve any detriment to the neighborhood.

Sincerely,

Robert A. Cline
