RE: Special Exception Application No. 16766 ("Nastos Construction")
1421 Kenilworth Avenue, NE, Washington, DC 20019

Dear Chairman:

This letter contains two radio frequency ("RF") signal propagation maps relating to the proposed AT&T Wireless facility at Nastos Construction. On the first map, "Location of Proposed Nastos Site, with Coverage Holes Shown", shows wireless signal coverage in yellow. Those areas of white are those portions of DC where AT&T currently does not have adequate wireless telephone coverage. As you can see from the second map, "Location of Proposed Nastos Site, with Coverage Filled In", by granting a special exception for Nastos Construction, AT&T can fill this gap in coverage so DC residents and commuters have seamless, quality wireless service.

These signal propagation maps were shown to the DC Office of Planning today in connection with its report to the Board of Zoning Adjustment and are to be considered proprietary and confidential. Should the Board want to disseminate these maps to anyone other than the Board, please consult with us beforehand.

Respectfully Submitted,

Edward L. Donohue
