Regarding BZA Application No. 16803

I am writing at the request of Mr. John Casey of JFC Builders, Inc.

I was initially in favor of the proposal considering the information submitted for my review in December, 2001. I visited the site and was satisfied that there would be no detrimental impact on the community, and no constituent had registered opposition to the project.

At the February ANC-1B meeting a number of accusations were made as issues in opposition to the proposal. When the vote was called, those issues had not been satisfactorily resolved. I could not vote in support of the application.

Since then, I have had an opportunity to evaluate all of the information submitted in this case. I find that the points made in opposition are not relevant to the application that is before the Board of Zoning Adjustment. I strongly support approval of Board of Zoning Adjustment Application No.16803.

Sincerely,

Calvin Woodland, Jr.
Commissioner ANC 1B08
