The District Department of Transportation (DDOT) has reviewed the carpool program that was submitted by the Applicant December 2003. The key components of St. Patrick's Carpool Initiative, developed with input from DDOT, include:

- Performance monitoring
- Preferential dismissal times
- Financial incentives
- Carpool marketing
- Community education

The goal of the Carpool Initiative was to increase the average vehicle occupancy during the morning and afternoon peak hours and peak periods to 1.60 students per vehicle. Based on the data that has been provided to DDOT by Wells & Associates, LLC, this goal has been met, and at times exceeded by 14 to 16 percent.

DDOT believes the conditions established for approval of acceptance of a special exception have been met.
